

St Mary's Tennis Club- Sun and Hot Weather Safety Policy

Individuals, parents/carers of juniors and guests are responsible for their sun and hot weather safety. It is advised that hats and tops that cover the shoulders are worn and sun screen applied before play begins.

There is a small amount of high factor sun screen in a wall cupboard on the left hand side of the kitchen. This is intended for those odd occasions when sun screen has been forgotten.

If a junior attends a coaching session/camp without sun screen the coach will supervise the junior applying the sun screen only with the permission of the parent/guardian. The cold water supply to the kitchen is drinking water and water bottles may be filled here. There is also an external water tap by the pressurised watering system
